

Data Services

With Consat Telematics' Data Services, you have data at your fingertips. Our data services offer a cost-effective, all-in-one solution with customised data overviews and support from experienced professionals for transit service planning, operations, and analytics.

Cost-effective all-in-one need to hire external consultants for data analysis, report generation, and planning.

Deeper Insights and Make Informed Decisions

Our data services present data in an interactive and customizable report format through Power BI, making it easy to understand and analyse. These reports can be tailored to meet the specific needs and preferences of the customer as they are presenting data in a clear and organised format.

Scalable Solutions- Grow Your Business Efficiently

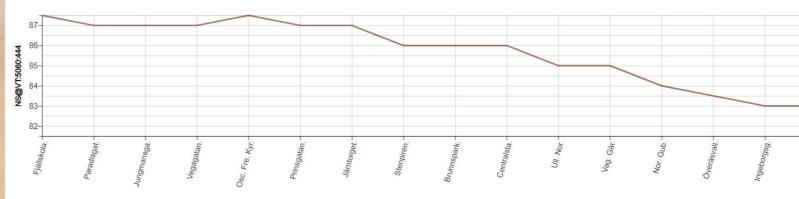

Customised and Interactive Data Reports - Gain

We offer different service levels to meet various budgets and needs. Whether you need recurring reports, specific analytics, or input for presentations to show the performance of your transit services, we have you covered.

Expert Support from a Professional Team - Maximise Your Potential

We provide comprehensive data services, including support for contract management and transit service planning, operations, and deep dive analytics. Our team of professionals with experience from operations world-wide provide the support and guidance needed to make informed decisions.
